

RAVALI SINGANAMALA

Full Stack Developer — Flutter · Core Java & Spring Boot · Firebase

+91 6304164697 | Singanamalaravali@gmail.com | Hyderabad – 500016 | [linkedin.com/in/singanamala-ravali-939613225](https://www.linkedin.com/in/singanamala-ravali-939613225) | ravali-singanamala-portfolio.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and shipping production mobile and web applications end to end — from Core Java/Spring Boot REST APIs to responsive Flutter UIs. Delivered 3 production applications: CloudBus and ActNow are live in production, and LocalTaxi (driver + passenger apps) is in final rollout to production. Independently designed and built SprintFlow, a full-stack agile team management app, end to end. Hands-on with Flutter state management (Riverpod, BLoC), Firebase (FCM, Firestore, Auth), MySQL, and AWS EC2 deployments. Strong debugging, code review, and Agile/Scrum delivery track record.

TECHNICAL SKILLS

Mobile	Flutter (2.x–3.x), Dart, Android, iOS, Material Design 3, Custom Widgets & Animations, Responsive UI (mobile/tablet/desktop)
State Management	Riverpod, BLoC, Provider
Firebase	FCM Push Notifications (HTTP v1 API), Firestore (real-time listeners), Firebase Auth, Firebase Analytics
Backend	Core Java, Spring Boot, Spring MVC, RESTful APIs (JSON), Maven
Database	MySQL (schema design & query optimization), SQL, Firebase Firestore, Firebase Realtime DB
Cloud & DevOps	AWS EC2, Git, GitHub, GitHub Actions, PuTTY, WinSCP
Web Frontend	Angular, HTML, CSS
Payments	Razorpay SDK, UPI workflows
Architecture	MVC, Clean Architecture, Agile / Scrum
Tools	Android Studio, Postman, Flutter DevTools
Problem Solving	Debugging, Root Cause Analysis, Performance Optimization, Production Issue Tracking

WORK EXPERIENCE

Flutter + Full Stack Java Developer

Feb 2024 – Present

Alladi Cloud Solutions | Hyderabad, India

- Delivered 3 production applications — CloudBus and ActNow are live in production; LocalTaxi (driver & passenger apps) is in final rollout to production.
- Built scalable RESTful APIs using Core Java, Spring Boot, and Spring MVC; designed and optimized MySQL schemas and queries to improve application performance.
- Built cross-platform Flutter apps for Android and iOS from a single codebase, using Riverpod and BLoC for state management.
- Used Firebase Cloud Messaging (FCM) for real-time push notifications — ride status and booking alerts between driver and passenger apps — and Firestore for live booking-state sync, with Firebase Auth for secure user management.
- Built custom animated Flutter widgets for smoother transitions and a more polished user experience.
- Integrated Razorpay payment gateway for in-app fare collection supporting UPI, cards, and wallets.
- Managed end-to-end deployment on AWS EC2 using Maven builds, WinSCP file transfers, and PuTTY server management.
- Maintained Git workflows, conducted code reviews, and collaborated with frontend and QA teams in Agile sprints to deliver committed features on time.

PROJECTS

CloudBus — Online Bus Booking System

In Production

Tech: Flutter · Spring Boot · Core Java · AWS EC2 · REST API

- Mobile and web booking platform for inter-city bus routes: seat selection, booking confirmation, and ticket generation.
- Built Spring Boot microservice APIs for route management, seat availability, and booking lifecycle.

- Deployed to AWS EC2 and managed via WinSCP/PuTTY for server-side configuration.

ActNow — Learning & Assessment Platform

In Production

Tech: Flutter · Spring Boot · Core Java · MySQL · AWS EC2

- Developed backend modules using Spring Boot including authentication, user management, and testing functionality.
- Implemented Practice Tests, Chapter-Level Tests, and Full Tests so students can track performance and progress.
- Designed a scalable backend architecture with efficient logging and debugging mechanisms.
- Built the Flutter front end with a responsive UI for the learning and assessment experience.

LocalTaxi — Online Cab Booking System

Going to Production

Tech: Flutter · Spring Boot · Core Java · Angular · Firebase (FCM) · Razorpay · AWS EC2

- Developed backend logic for driver-passenger matching and ride booking workflows, with modules for drivers, passengers, companies, and administrators.
- Integrated Firebase Cloud Messaging (FCM) for push notifications including ride updates and booking confirmations.
- Built responsive cross-platform mobile interfaces for both driver and passenger apps using Flutter.
- Integrated Spring Boot backend APIs for booking validation and secure payment workflows via Razorpay.
- Optimized backend performance to handle multiple concurrent ride requests, improving scalability and reliability of real-time ride allocation.

MTM — Mobile Bartering Platform

Tech: Flutter · Spring Boot · Angular · Firebase Auth · REST API

- End-to-end cross-platform app for peer-to-peer barter: listing items, negotiating trades, and completing transactions.
- Built Spring Boot APIs covering barter listing, trade negotiation state machine, and transaction tracking with audit trail.
- Used Firebase Auth for secure user management; added image upload with location-based item discovery using Geolocator.
- Optimized API response handling with Dio interceptors for retry logic and error normalization.

SprintFlow — Agile Team Management App

Independently Designed & Developed

Tech: Flutter · Dart · Firebase (Firestore, Auth, FCM) · Riverpod · BLoC

- Independently conceived, designed, and built a cross-platform Flutter app for managing agile sprints, user stories, daily standups, and team attendance with role-based access control.
- Implemented 5 distinct user roles — Admin, Product Manager, Product Owner, Developer, and Tester — with granular permission logic.
- Integrated Firebase Cloud Messaging (FCM HTTP v1 API) for real-time push notifications on story assignments and sprint updates.
- Designed a Firestore-backed data layer with clean architecture repositories, each domain fully decoupled.
- Used Riverpod and BLoC for state management across real-time Firestore streams and asynchronous data flows.
- Built a responsive UI with a custom Responsive helper class adapting layouts across mobile, tablet, and desktop.

PROFESSIONAL ACHIEVEMENTS

- Rookie Award — Recognized for excellent performance and impactful contribution.

EDUCATION

B.Tech — Electronics & Communication Engineering

2018 – 2022

Vaagdevi Institute of Technology and Science, Proddatur, Kadapa | CGPA: 7.8 / 10

Intermediate (MPC)

2016 – 2018

Sai Parameswara Junior College, Jammalamadugu, Kadapa | 94%
